## **Re: L&S HIRING NOTICE – SAP DEVELOPER**

Lark & Stern Core Services Pty Ltd. is looking for passionate SAP Developers to join our team. We are looking for applicants interested in working in a forward-thinking, fast-paced and dynamic environment, where they will be exposed to a diverse range of applications and software products.

Successful applicants can expect to be part of an intimate network of talented developers and software innovators, where they will learn new skills and find value in their contributions to a variety of industries including Life Sciences and Biologics.

Our clients usually have an established and validated enterprise resource planning (ERP) system using SAP software (the “ERP System”). As part of our usual scope there's requirements for front-end and back-end development which extends to enhancing existing applications or packaging new applications using UI5 / JS.

We are looking for resources to help with the technical implementation of these solutions. The work itself requires support on both the front-end development side UI5/JS and back-end ABAP/Gateway. Knowledge on the modules of MM, QM, and PP-PI is beneficial to help with some functional understanding of requirements.

### **Qualifications:**

- Javascript, Java, SAP UI5, ABAP, SQL
- Project experience
- Experience in Agile environments a plus
- Experience with SAP a plus
- Git/Development Pipeline experience

A Computer Science/Programming background is preferred.

This position will be for an in-office position in Pretoria, South Africa.

Kind regards,

---

Frieda van der Merwe - Internal Operations Manager

Lark & Stern Core Services
